Assessment Score Verification Policy

ABPD offers score verification service to candidates that wish to have the accuracy of their reported scores verified. Score verification requests must be submitted within 30 days after exam results are issued.

- Verification of a candidate's QE score is limited to verifying that the responses recorded were correctly scored as correct or incorrect and their total score was correctly transformed into a scaled score.
- Verification of a candidate's OCE score, will verify that the examiners' ratings for the candidate were accurately recorded, recalculate the scaled score and verify that the scaled score and pass/fail decision were accurately reported to the candidate. Examiners will not reevaluate the examinee performance.

The score verification service is not a review of the content, a review of the correct answers, the acceptability of testing site conditions or examiner style, or a reconsideration of the passing standard. Candidates that wish to request the exam score verification service should contact ABPD staff. The fee for the score verification service is $250. We will communicate the exam score verification outcome within six weeks of receiving the request.
